*"Good design is about flow, one space unfolding into the next. Even a small detail can change so much and pull an entire design concept together." - Designer Eva Quateman*

Many of our clients, whether they are young or empty nesters, are gravitating toward open, less formal floor plans. The "Great Room" concept, if you will. The Zenit Storage Unit at Haute Living is perfect for its multi-functional use in that it can become a room divider, in addition to all of the storage and display space it provides. The perfect item to display is the black and white Aspen Leaf Vase by Dante Marioni at Ken Saunders Gallery. There is something about the art of blown glass that creates a sense of wonderment. The double-duty SAKé sectional sofa at WPA Chicago is a fabulous stream-lined sofa and opens up to become a bed without the cumbersome look of a sleeper sofa. I love to mix scale—the large storage unit and sectional sofa balanced with a pair of the Monte Mini Chairs from our Eva Quateman Essentials collection is perfection. Even open spaces need a grand entrance and it's important to make a statement. The Elay Kishimoto Stripey Zig Zag Birds wallcovering from Urban Source makes a strong impact in any entry or powder room. When your kitchen is visible to the main living area, as is often the case in flexible spaces, a more sophisticated backsplash is just the ticket and the Olive tile by Green Home gives the right amount of pattern and style. The Cody desk from Modshop has a great mixture of materials and no visual bulk, yet offers so much function. Not only is it a desk, it can double as a buffet or an entrance table.
